

**High quality amusements
for profitable business and
for successful people!**

page 4...17

Electric boats

The pool with electric boats (bumper boats) is one of the most popular amusements produced by *RIF*® company.

A special feature of this amusement is that it may equally be used in a city park on the promenade or the beach, and some of our customers use electric boats with motor even in open water (sea, lake).

page 18...26

Amusement parks

This section presents several kinds of amusements.

Low initial cost, minimal maintenance costs, ease of storage and long life are the main advantages of park amusements from *RIF*®.

Almost all amusement models being manufactured by us are available for children and adults.

Our main goal is your maximum enjoyment of leisure and business.

The main difference between park amusements of our production from those of other manufacturers is uncompromising quality and attention to details.

page 27...34

Water slides

In the production program of the *RIF*® company there are inflatable slides for every taste and budget.

Particular attention should be given to a series of water slides with pool. The work of slides of this series is almost independent of the vagaries of nature, ie they do not depend on the temperature of the water in the pond or on the storm.

To operate an inflatable water slide, you must install the tower-support. When installing the tower-support it is required to take into account that the depth of the water in a place where the chute of the slide ends, should not be less than 0.8 meters.

The manufacturing process for the slides - only manual gluing with multistage quality control system.

page 35...39

Towed amusements

Manufacturing towed inflatable amusements, we use only high-quality materials, enhanced towing knots, soft but strong attachment of handles, and the reliability of the joints is ensured by the qualitative manual assembly.

Constant communication with customers enables us to improve our towed amusements, using their experience in the operation and constructive criticism. As a result - we offer you exceptionally reliable inflatable water amusements in the very wide range.

Exploitation of these amusements without life jackets is strictly prohibited!

Electric boats or bumper boats with electric motor is a visiting card of our company, which are made almost since the founding, and confidently hold leading positions, and it is more than 15 years. We started from the small electric boat model "Hummingbird", and now there are ten different models in the production line, and that's not counting the endless colour combinations.

The main advantages of our products:

- simple operation, which allows even small captains independently to set a course for this boat.
- high load capacity of most models, which expands the operational capabilities and provides the absolute safety.
- almost all models are universal, ie available for children and adults.
- materials from which our boats are made are the products of the leading companies in this industry, which is used by many companies in the world yacht building.
- our electric boats packaging arrangement is the most complete, ie immediately after the purchase you can start the operation. In addition, the repair kit of the boat includes the most needed "consumable" materials.
- according to your order, any model of children's boat with an electric motor can be made in any combination, sometimes even in the most incredible colours.

Socket for charging on the water enables charging the battery without removing it from the boat, it is convenient, yet it limits the use of the boat. If you want the boat to operate continuously, you need to replace the battery.

Rechargeable battery is the battery supplied in the kit, the battery is "deep" discharge, designed for 4000 cycles "charge - discharge", and is made by technology AGM, the maximum that protects the environment. Battery with the voltage 12 volts, the capacity - 80 A / h.

The system of remote service and consultation. All possible problems can be easily determined by yourself, make an order over the Internet, and in a few days get in your place all the necessary spare parts.

The digital control system is fitted as standard on our boats, allows the owner of the amusement to control its use, monitors the status of the battery and signals the need to recharge or replace, as well as counts the time of each operating cycle.

Battery charger for the battery is fully automatic, a powerful charger that is best suited for this particular type of battery.

The electric motor installed on the boat, is rated at 12 volts, which reduces the weight of the amusement, because it uses one battery. Engine power is 400 watts.

Load caring capacity.

Dimensions of the product.

Prefabricated pools are a set of all the necessary elements for the organization of the amusement with electric boats "Aquadrome" in any place: in the park, on the beach, or on the waterfront in the town square.

We offer several types of pools, the choice depends on your desire, or the size of your platform:

- multangular
- rectangular
- round
- oval
- "eight" shape

Each of this type has its own advantages and disadvantages; more detailed information is available on the website.

All our pools are simple to assemble and install, and they are designed so that their transport and storage is also not difficult.

In any set of modular pool it is included a set of metal constructions, powder paint coated, and the insert - waterproofing, and assembled 2-meter berth.

Additionally, you can order board decoration of the pool, decorative back or side wall, the filter system and a larger berth. When selecting the size of the pool it should be noted that for operation of one of the bumper boats "Mustang" or "Junior" it is needed 20-25 sq.m. area of the basin, and for electric boats "Swan", "Pelican", "Duck", "Pirate", "Dragon", "Crocodile", "Dinosaur" or "Scooter" - 25-30 sq.m.

In the production program of the company *RIF®* There are several types of small amusement parks. This allows assembling a mini-park on the street, on the waterfront or in the entertainment centre.

Low initial cost, minimal maintenance costs, ease of storage and long life are the main advantages of park amusements from *RIF®*.

Additional reasons for choosing our production:

- easy to transport;
- all the amusements are assembled, and dimensions of parts from which they are made let you carry our amusements with the ordinary technique, without specific requirements for transport;
- simplicity of assemblage;
- all the amusements are provided with very detailed instructions and labelling that allows you to collect your own amusement, excluding the additional costs of supervision;

- almost all models are universal, ie available for children and adults;
- amusement equipment - considering the wishes of customers, RIF® completes its attractions with all the necessary - repair kit, pumps, fans, hoses, all kinds of adapters and spare parts. All of this delivered as a set, that is, when buying amusement RIF® client does not arise unexpected and unpleasant need to pay extra for something;
- for special orders, we will offer you amusements on your size, configuration and completeness. You can choose a colour palette as well.

Constant communication with customers enables us to improve our amusements using their experience in the operation and constructive criticism. As a result, we offer you exceptionally reliable park amusements in the very wide range.

2. Park amusements "Spiderman"

19

Six-meter column of coloured tubes with a multi-tiered "spider web" is able to take a large number of small brats and detain them for a long time. To climb up and then descend back is not as easy as it may seem. Coloured "web" does not let its prey quickly and easily.

"Spiderman" amusement is supplied with plastic slide and a few supports. This is a combination of two amusements in one! Starting height of the slide is 3,5 m

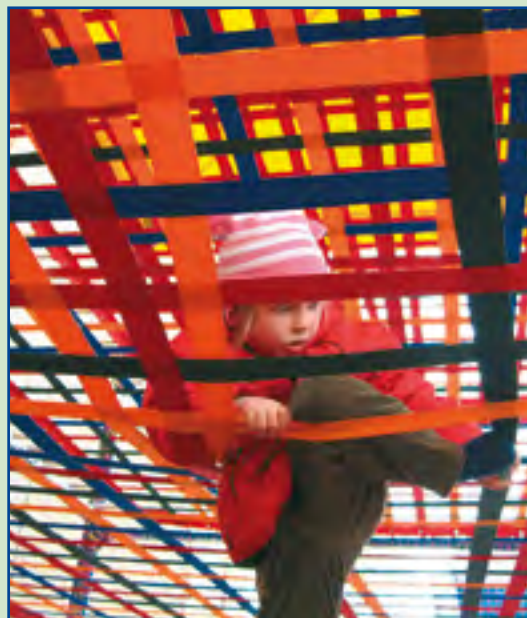

"Spiderman"

Model	code	length, m	width, m	height, m
M5	02001	6,5	3,8	6,5
M4	02002	5,5	3,4	6,5

Attention! Restriction on growth - from 0,7 m to 1,6 m.

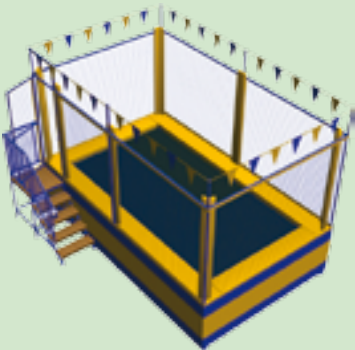

Attention! It should be fixed to the ground by tension wire.

2. Park amusements “Jump”

“Jump” is an amusement for the usage in any environment. This can be the seashore and the city park or amusement park. Does not need power! Depending on the location, can be produced from 1 to 16 seats. Only one person is allowed to jump in one net! Safety mats and durable capron net ensure a relaxing stay for all. Trampoline up to 8 places is served by only one operator!

GJ - 2 (internal)	02201	9,15+0,75	5,5	3,5

Incredible feeling of jumping into the soft cubes and complete immersion in them!

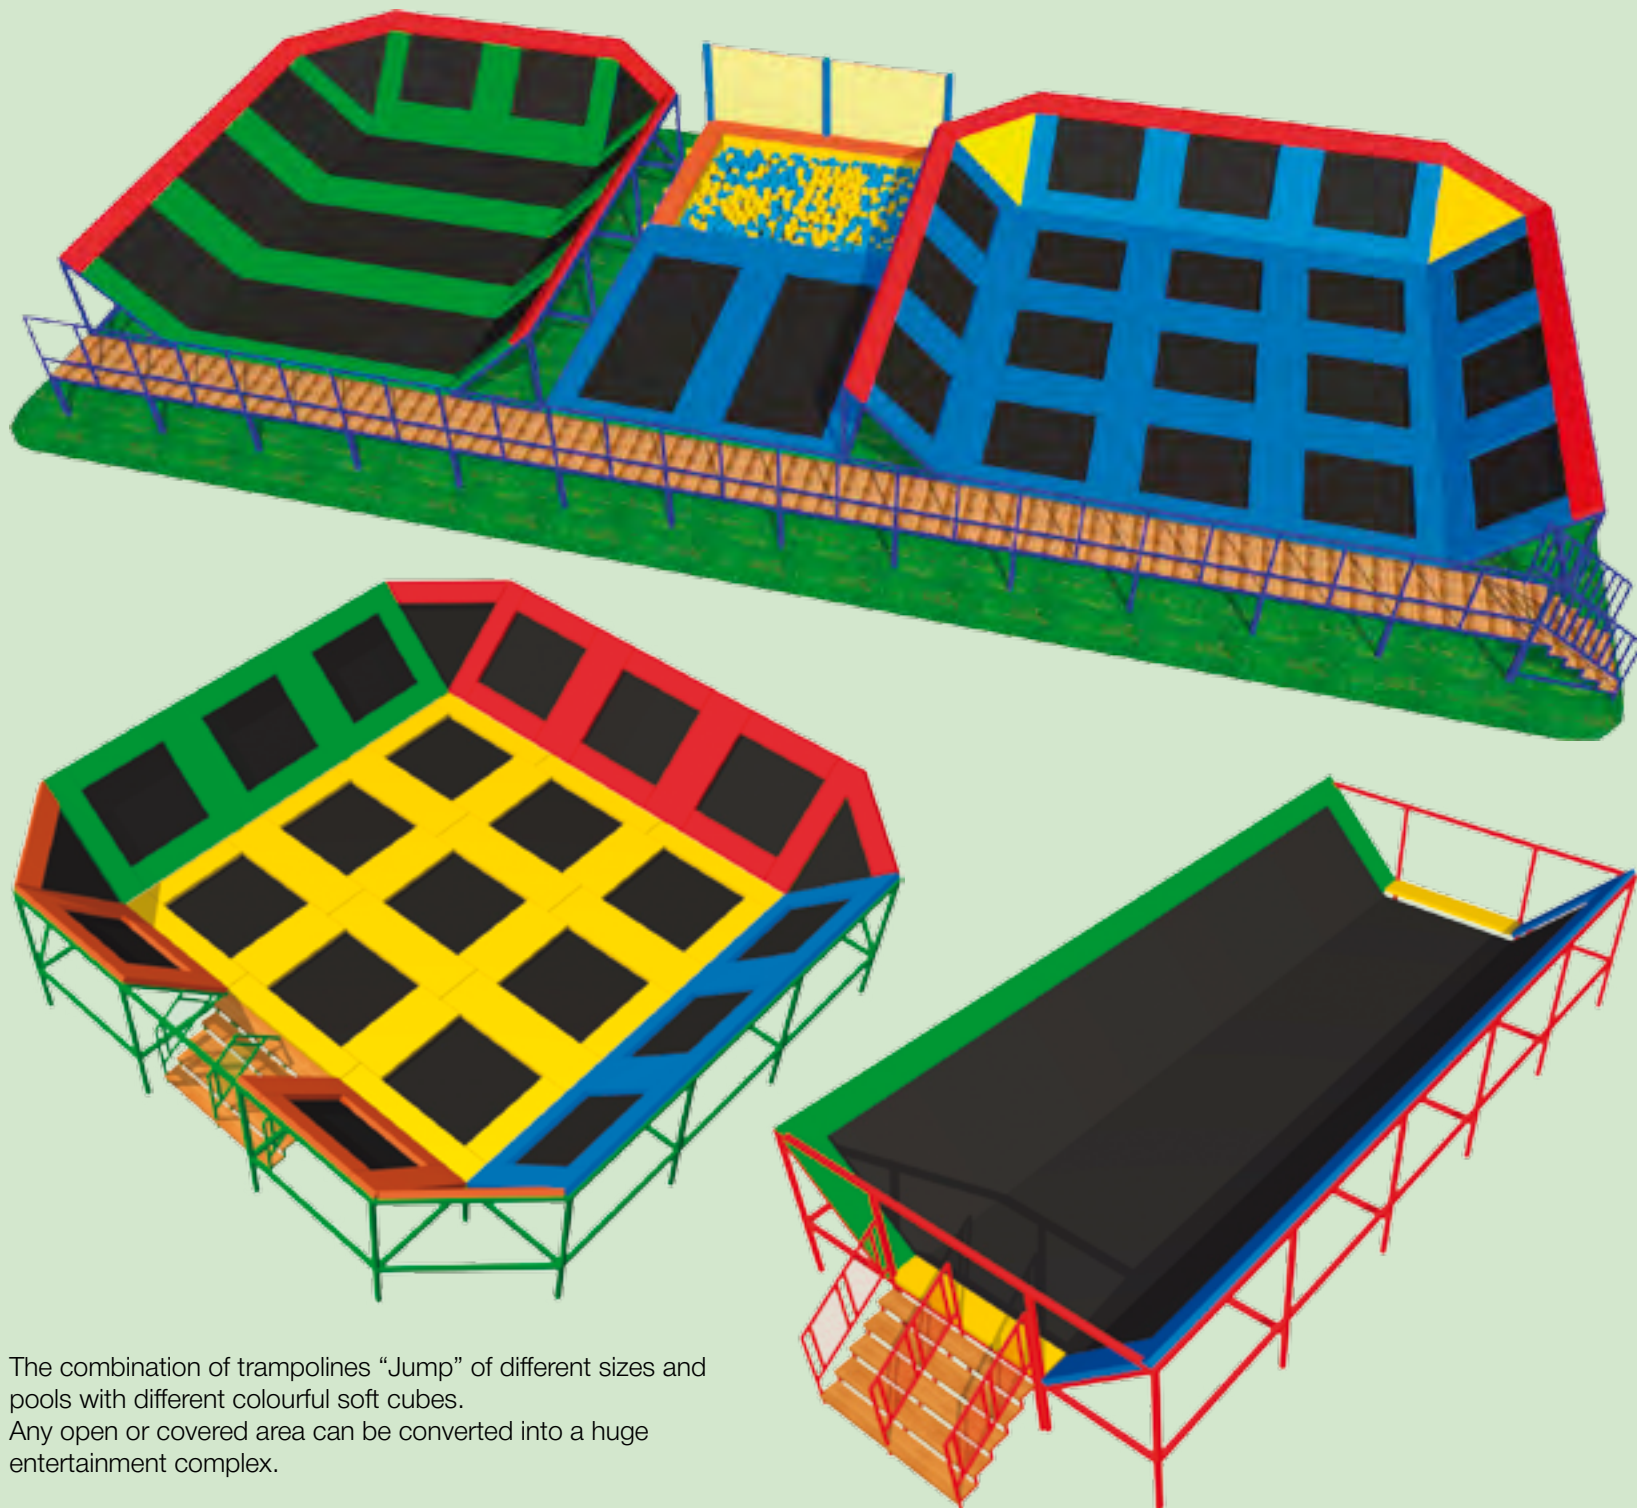

External design, code 02201

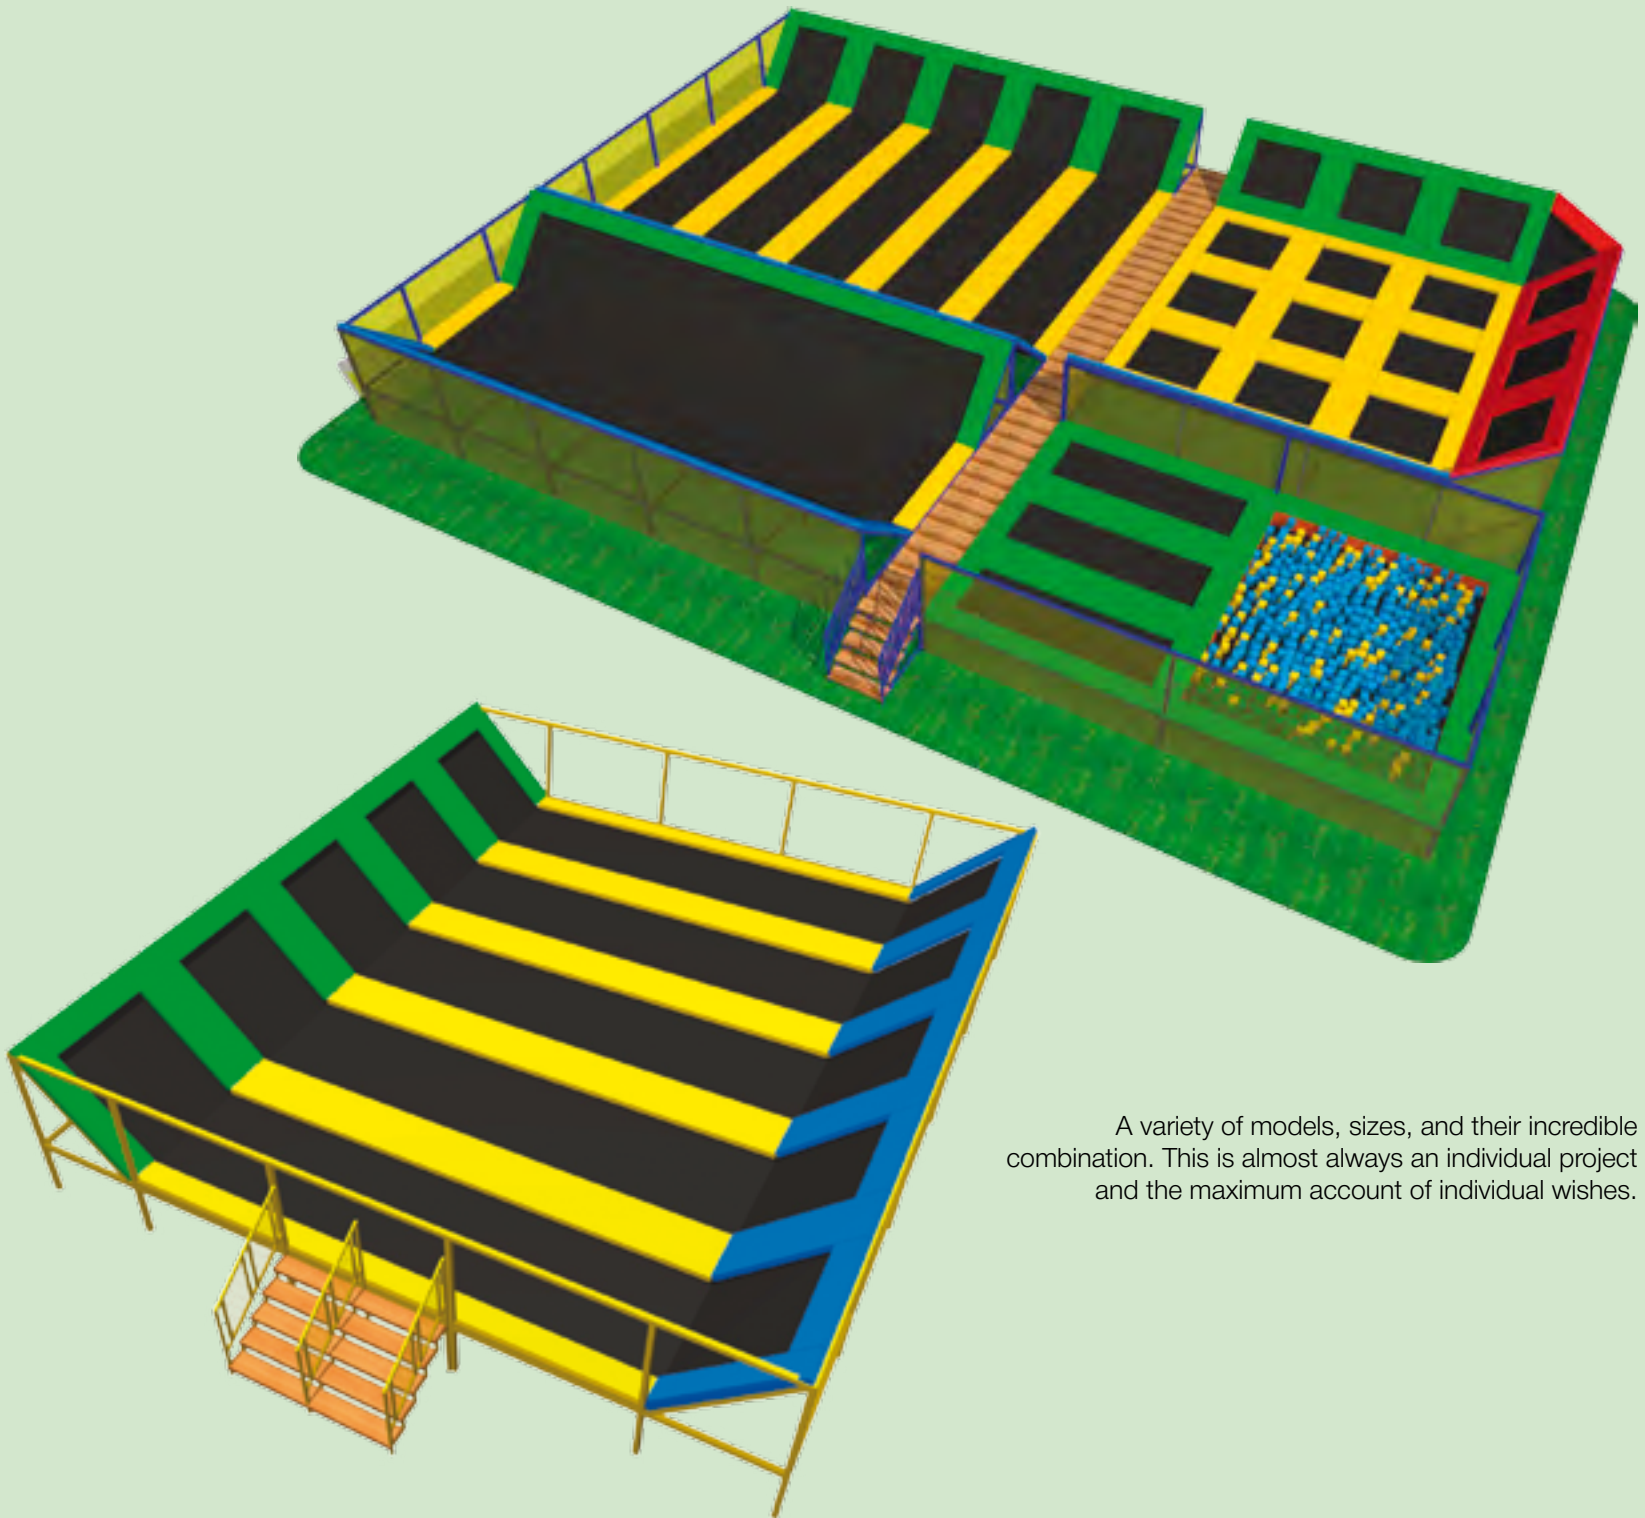

The first zone is "trampoline" - two or more jumping nets for training and entertainment, and the second is "recreation area", a pool with colourful soft cubes, to get out of which it is not easy.

2. Trampoline park

The combination of trampolines “Jump” of different sizes and pools with different colourful soft cubes. Any open or covered area can be converted into a huge entertainment complex.

A variety of models, sizes, and their incredible combination. This is almost always an individual project and the maximum account of individual wishes.

2. Amusement parks “Slippery Football”

There is football on the grass, there is a beach football, and we offer a “slippery”. Thin layer of water on the slippery surface of the field bring to the familiar game new features. Soft ground field protects against possible injury, but the game takes on new unforgettable experience.

The amusement set includes inflatable field with gates, fan for its filling and a special footboard. It is hard enough to run on it, but at the same time, soft enough to be able to play without injury even on a concrete base.

“Slippery Football”				
Model	code	length, m	width, m	height, m
M1	02400	28,0	15,0	2,5
M2	02401	16,7	8,5	2,6

Low initial cost, minimal current expenditure on operation, ease of storage and long life. These are the components of a successful investment in inflatable water slides produced by the *RIF*®.

Almost all models of slides that we produce are universal, ie available for children and adults. Only the smallest models of the slides are only for children.

In the production program of the *RIF*® company there are inflatable slides for every taste and budget. Particular attention should be given to a series of water slides with pool. The work of this series of slides is almost independent of the vagaries of nature, ie they do not depend on the temperature of the water in the pond or on the storm.

To operate an inflatable water slide, you must install the tower-support. When installing the tower-support it is required to take into account that the depth of the water in a place, where the chute of the slide ends, should not be less than 0.7 meters.

Note, that the model of inflatable water slides with index “S” is manufactured together with the pool. This provides extra security during the descent, because your client enters the pool always horizontally, and in front (!) 3-5 meters of water, even if the maintenance staff forgot to check the water level in the pool.

Constant communication with customers enables us to improve our amusements using their experience in the operation and constructive criticism. As a result, we offer you an exceptionally reliable inflatable water slides in the wide range.

3. Water slides

Line "Shuttle"				
Model	code	length, m	width, m	height, m
M10	03100	10,0	4,0	3,8
M10D	03101	10,0	4,0	3,8
M7.5	03102	7,5	4,0	4,0
M7.5T	03103	7,5	4,0	4,0
M7.5TS	03104	7,5+3,5	4,0	4,0
M5	03105	5,2	3,0	2,7
M5T	03106	5,2	3,0	2,7
M5D	03107	5,2	4,0	2,7
M5TS	03108	5,2+3,5	3,0	2,7
M3	03109	3,6	2,0	1,8
M3TS	03110	3,6+3,0	2,0	1,8

Line "Shuttle" is the most compact and mobile model of inflatable slides produced by RIF®. Inflation and installation of a hill on the anchor will take about an hour to complete, and will provide a full working day. Be sure to use anchors or loads! Wetting the surface of the slides can be made manually!

PLEASE NOTE: the length refers to the length of the descent on the hill, and under the height - the height of the launch site from the water.

3. Water slides

29

"Dragon"

M20S

If to the rapid descent one would like to add impressions, so these are inflatable water slides series "Dragon". Behind the external simplicity hides unexpected peculiar sensation of descent, which you will certainly want to experience again and again. It is the most popular model among our water slides.

Line "Dragon"				
Model	code	length, m	width, m	height, m
M15	03150	15,0	2,1	5,0
M20S	03151	15,0+5,0	2,0	5,0
M11	03252	11,0	2,0	3,8
M15S	03253	11,0+4,0	2,0	3,8

"Dragon" slides with index "S" are inflatable slides with a pool that will help you not to depend on the vagaries of nature.

"Dragon"

M15

PLEASE NOTE: the length refers to the length of the descent on the hill, and under the height - the height of the launch site from the water.

3. Water slides

You need strong feelings, then a line of inflatable water slides “Hara Kiri” is for you. This line is with a steeply dipping chute - the most extreme in the production program of RIF®!

From the water slide starting ground of 6 meters, all the more of 8 meters, you will feel real extreme, but this is only for the first time, later it is easier and you would like to repeat it again and again.

Line “Hara Kiri”				
Model	code	length, m	width, m	height, m
M8	03200	12,8	2,0	8,0
M8S	03201	12,8+6,2	2,0	8,0
M6	03202	10,5	2,0	6,0
M6S	03203	10,5+5,2	2,0	6,0

We recommend buying a 6-meter slide for use in a single version, and the 8-meter only as part of a complex of several water slides.

PLEASE NOTE: the length refers to the length of the shutter on the hill, and under the height - the height of the launch site from the water.

Line "Kamikaze"				
Model	code	length, m	width, m	height, m
M8	03250	14,0	2,0	8,0
M8S	03251	14,0+6,2	2,0	8,0
M6	03252	11,2	2,0	6,0
M6S	03253	11,2+5,2	2,0	6,0

The opened arched chute of "Kamikaze" water slides line is less extreme then "Hara-Kiri" slides line. However, standing on the launch site at a height of 6 meters, not to mention the 8 meters, you would think that the "Kamikaze" is not the name of a water slide, and your destination. And after a couple of minutes you want to experience those feelings again! With all the extreme-ness inflatable slides of "Kamikaze" line children and adults are very fond of.

The slides "Kamikaze" with "S" index are the inflatable water slides with the pool, which will help you not to depend on the vagaries of the nature. This is the most secure version of extreme slides.

PLEASE NOTE: the length refers to the length of the descent on the hill, and under the height - the height of the launch site from the water.

3. Water slides

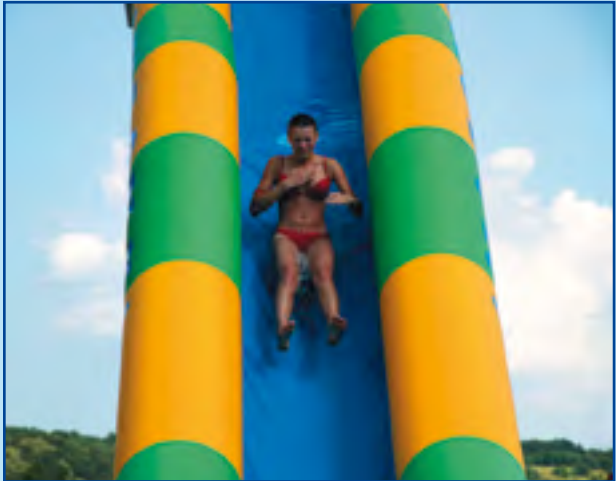

"Amazon"

"Amazon"

The combination of the water slide "Kamikaze" and inflatable slides "Dragon" is a line of "Amazon". The main advantage of the model is a thrill by the simple design. Like many popular models, inflatable slides of this line can be made with a shallow, completely safe pool.

Line "Amazon"				
Model	code	length, m	width, m	height, m
M8	03300	14,5	2,0	8,0
M8S	03301	14,5+6,2	2,0	8,0
M7	03302	13,1	2,0	7,0
M7S	03303	13,1+5,7	2,0	7,0
M6	03304	11,7	2,0	6,0
M6S	03305	11,7+5,2	2,0	6,0

PLEASE NOTE: the length refers to the length of the descent on the hill, and under the height - the height of the launch site from the water.

3. Water slides

33

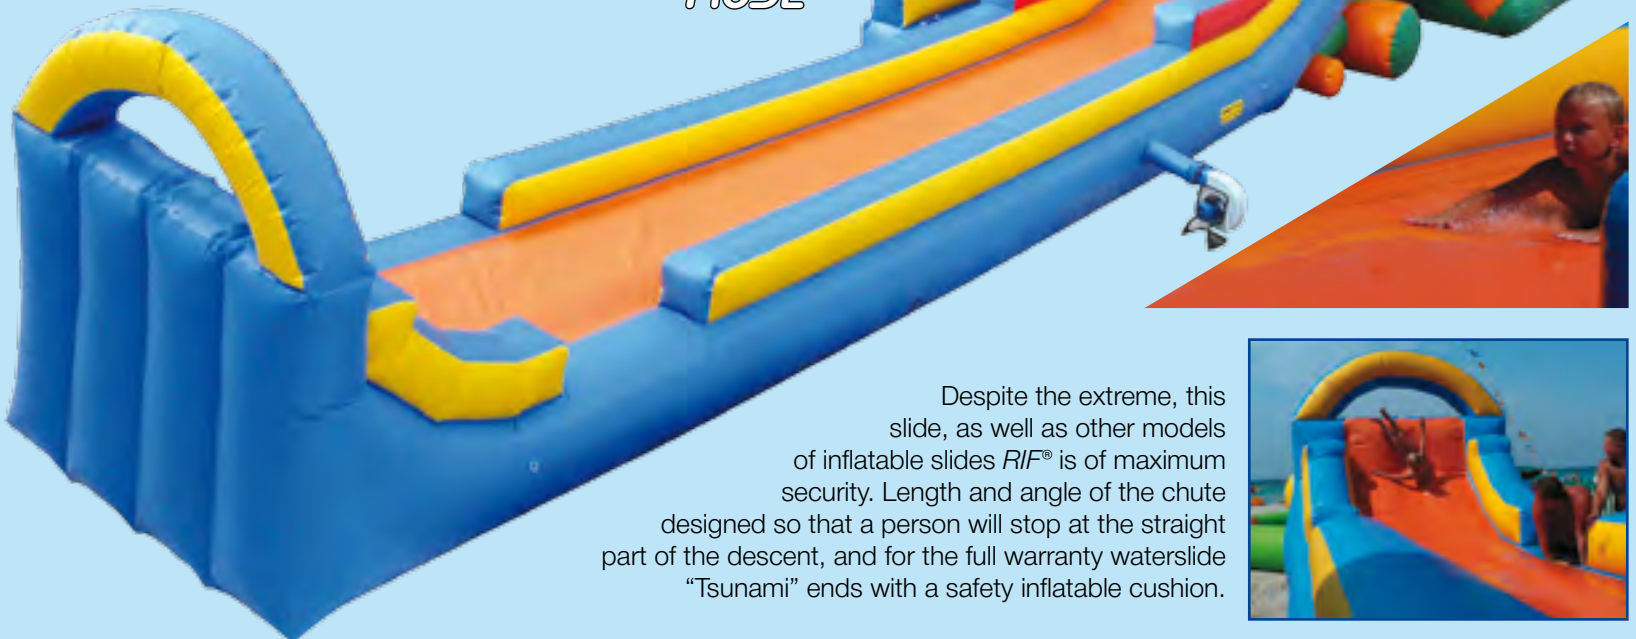

Inflatable slide “Tsunami” is a new extreme version of the waterslide. The rapid descent from the steeply dipping height is a real challenge. The absence at the end of the descent pool of water adds spice to the feeling. We offer new and unusual experience!

Line “Tsunami”					
Model	code	length, m	width, m	height, m	height of the launch site, m
M5 SL	03350	17,5	6,3	8,0	5,0
M6 SL	03351	21,5	6,5	8,6	6,0
M7 SL	03352	25,5	9,4	9,9	7,0

And, as usual, everything is included! Get it, inflate, fix and work! Complete independence from the cold water and from any storm!

M6SL

Despite the extreme, this slide, as well as other models of inflatable slides *RIF*® is of maximum security. Length and angle of the chute designed so that a person will stop at the straight part of the descent, and for the full warranty waterslide “Tsunami” ends with a safety inflatable cushion.

ATTENTION: This slide is supplied with fan. This model of the slides is not an airtight product.

3. Water slides

<i>"Pyramid"</i>				
Model	code	length, m	width, m	height, m
P1	03400	6,5	10,3	3,3
P2	03401	6,5	9,0	3,3

"Pyramid" is an inflatable water slide and at the same time the island on the water, it is always attractive to children, loving all at once: jump, climb and swim.

The complex is an inflatable pyramid, from the top of which you can go down in several ways:

- just to go down the stairs;
- jump from any level directly into the sea;
- go down the inflatable slide.

From both sides of the "Pyramid" you can climb from the water by comfortable handles - steps. During operation, be sure to use the loads or anchors.

PLEASE NOTE: the length refers to the length of the descent on the hill, and under the height - the height of the launch site from the water.

It is impossible to resist the desire at least once to drive a “banana” and experience the speed, the wind whistling in your ears, spray in the face and emotions over the edge.

Manufacturing towed inflatable amusements, we use only high-quality materials, enhanced towing knots, soft but strong attachment of handles, and the reliability of the joints is ensured by the qualitative manual assembly.

Constant communication with customers enables us to improve our towed amusements, using their experience in the operation and constructive criticism. As a result - we offer you exceptionally reliable inflatable water amusements in the very wide range.

Very often, towed attractions are made of yellow colour, but because of the design features some of the models are made in other colours.

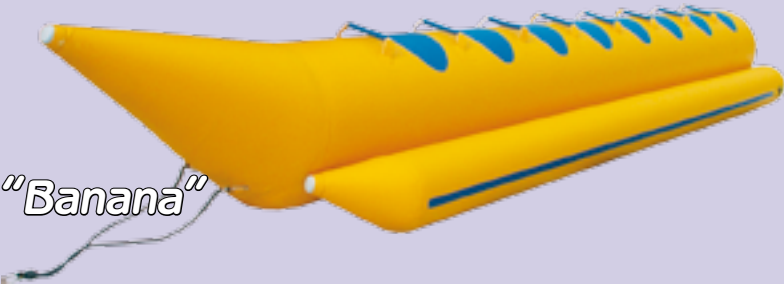

In addition, any model you like is possible to order in other colours. You should remember that it will increase the production time of the attraction, and might cost more. Choosing a combination of colours it is necessary to understand that some colours have bad “look” together, and some unusual colour will make your attraction unnoticeable in the sea from the shore.

Much to our regret, loading experienced by this kind of amusement is the most difficult and extreme, so durability of the attraction depends strongly on the frequency of use and the skills of the pilot on the boat.

Exploitation of these amusements without life jackets is strictly prohibited!

4. Towed amusements

“Banana” is one of the most fascinating and traditional amusement on the water. The simplest and reliable design. Reinforced tow knots, soft but strong attachment of handles, excellent material density 800 g/m² and high quality hand joining.

"Banana"		width 1,22 m height 0,81 m									
Seats number	2	3	4	5	6	7	8	10	12	14	
length, m	3,4	3,95	4,5	5,05	5,6	6,15	6,7	7,8	8,9	10,0	

"Double-banana"		width 2,15 m height 0,81 m									
Seats number	6	8	10	12	14	16	18	20	22	24	
length, m	3,95	4,5	5,05	5,6	6,15	6,7	7,25	7,8	8,35	8,9	

“Double-Banana” is a combination of traditional quality and two bodies. It is an ideal choice for parents with small children, as this model of the water amusement is very difficult to turn.

“Tropic” is slightly complicated design of “banana”. It is compensated by interesting look.

"Tropic"		width 1,22 m height 1,25 m									
Seats number	3	4	5	6	7	8	10	12	14		
length, m	3,7	4,3	4,8	5,4	5,95	6,5	7,6	8,7	9,8		

"Double-Tropic"		width 2,15 m height 1,25 m									
Seats number	6	8	10	12	14	16	18	20	22	24	
length, m	3,7	4,3	4,85	5,4	5,95	6,5	7,05	7,6	8,15	8,7	

“Double-Tropic” is the safest option and interesting design. Two bodies are like a bunch of “bananas”.

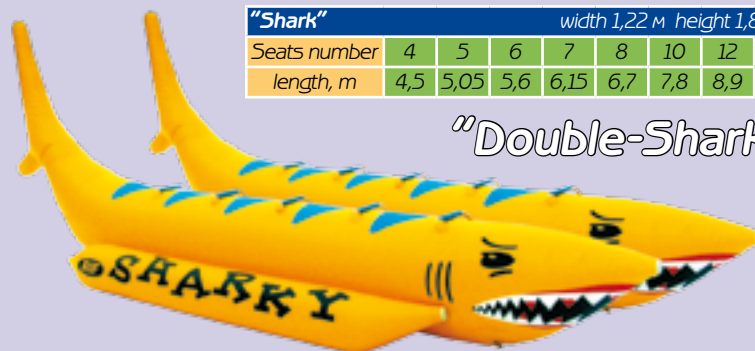

"Shark" is the most difficult towed amusement of RIF® production, yet very effective. Usually, this amusement is made of yellow colour, but can be ordered gray or combined colours.

"Shark"

"Shark"	width 1,22 m height 1,8 m							
Seats number	4	5	6	7	8	10	12	14
length, m	4,5	5,05	5,6	6,15	6,7	7,8	8,9	10,0

"Double-Shark"

As well as the "Banana", "Shark" may be formed as a "Double-Shark", with two rows of seats - two shark grins and two tails.

In addition, the "Shark" is available in the design "Twin" - a reliable closed O - shaped double body, ravenous grin and tail.

"Double-Shark"	width 2,15 m height 1,8 m					
Seats number	8	10	12	14	16	18
length, m	4,5	5,05	5,6	6,15	6,7	7,25

"Shark-Twin"

"Shark-Twin"	width 2,07 m height 1,8 m									
Seats number	8	10	12	14	16	18	20	22	24	26
length, m	5,2	5,7	6,3	6,85	7,4	7,95	8,5	9,05	9,6	10,15

Towed inflatable attraction "Raft" is the most secure and the most reliable kind of towed rides. Those who have already exploited the double row water sledge have a familiar problem with a permanent gap in medium tube, which accounts for the largest load. This drawback is totally missing in the "Raft" amusement!

"Raft"

"Raft" width 2,07 m height 0,77 m												
Seats number	8	10	12	14	16	18	20	22	24	26	28	30
length, m	4,6	5,15	5,7	6,25	6,8	7,35	7,9	8,45	9,0	9,55	10,10	10,65

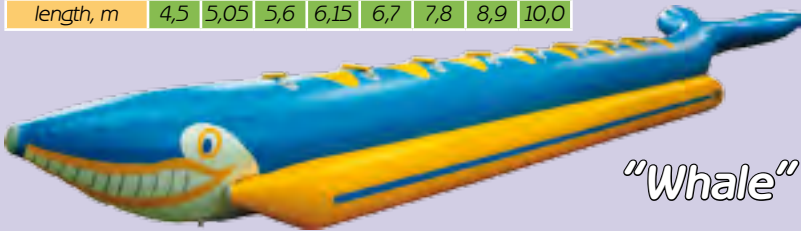

"Рафт"

ATTENTION! Exploitation of these amusements without life jackets is prohibited!

4. Towed amusements

"Whale"	width 1,22 m height 1,1 m							
Seats number	4	5	6	7	8	10	12	14
length, m	4,5	5,05	5,6	6,15	6,7	7,8	8,9	10,0

"Whale"

The sheer size of a cheerful "Whale" has always attracted tourists. It is delivered in only one colour option - blue. All decorations are made applique, ie they are forever!

"Whale" is available as well in the design "Twin" - a reliable closed O - shaped double body, gentle blue, always cheerful "smile" and a huge decorative "tail".

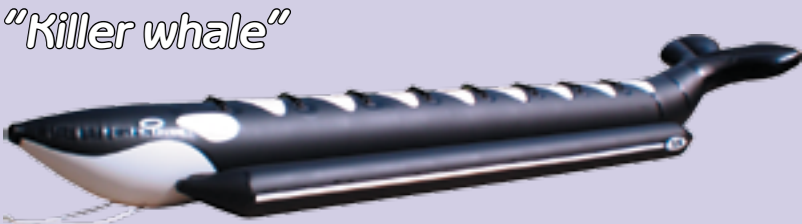

"Whale-twin"

"Whale-twin"	width 2,07 m height 1,5 m											
Seats number	8	10	12	14	16	18	20	22	24	26	28	30
length, m	5,15	5,7	6,25	6,8	7,35	7,9	8,45	9,0	9,55	10,1	10,65	11,2

"Whale-twin"

"Killer whale"

Towed inflatable amusement "Killer Whale" is the most unusual "inhabitant" of our seas. Very unusual design and traditional quality of RIF®.

"Killer whale"	width 1,22 m height 1,1 m							
Seats number	4	5	6	7	8	10	12	14
length, m	4,5	5,05	5,6	6,15	6,7	7,8	8,6	10,0

"Killer Whale-twin"

"Killer Whale-twin" is a combination of a reliable closed double body, unusual for amusement black colour, unchanged happy "smile" and a huge decorative "tail" stands out from the rest of this amusement.

"Killer Whale-twin"	width 2,07 m height 1,5 m											
Seats number	8	10	12	14	16	18	20	22	24	26	28	30
length, m	5,15	5,7	6,25	6,8	7,35	7,9	8,45	9,0	9,55	10,1	10,65	11,2

"Killer Whale"

ATTENTION! Exploitation of these amusements without life jackets is prohibited!

Cheerful African jungle dweller “Alligator” is ready to settle down in the seas and inland waters. The dimensions of this “jungle dweller” are much more than in nature and are limited only by the power of the engine towing.

“Alligator”

“Alligator”		width 1,22 m height 0,68 m						
Seats number	4	5	6	7	8	10	12	14
length, m	4,5	5,05	5,6	6,15	6,7	7,8	8,35	9,85

“Alligator-twin”

“Alligator-twin”		width 2,07 m height 0,8 m										
Seats number	8	10	12	14	16	18	20	22	24	26	28	30
length, m	5,2	5,75	6,3	6,85	7,4	7,95	8,5	9,05	9,6	10,15	10,7	11,25

Safety model “Alligator-twin” is a worthy completion of the family. Maximum reliability, maximum safety and the original design.

The most extreme amusement of RIF® family is “Batman”. The most unusual design, the biggest adrenaline rush! Only for extreme! The design of this attraction, under certain conditions, allows you to fly over the water surface.

Amusement is only for physically strong visitors!

“Batman” 2

“Batman” 3

There are two variants of the amusement 2-6 seats and 3-9 seats.

Line “Batman”				
Model	code	length, m	width, m	height, m
B2	820	3,4	4,3	0,85
B3	821	3,4	5,5	0,85

The index of “2” or “3” is the maximum number of passengers for the flight.

ATTENTION! Exploitation of these amusements without life jackets is prohibited!

All products presented in this catalogue is the own production program of *RIF*®.

The final product is a variety of *RIF*® amusements. It is a combination of fifteen years of amusement production traditions, team of highly qualified professionals and the use of materials of the highest quality. When we talk about quality, it means "The choice without compromise". We make our amusements from only the finest materials using the best components.

We have tested the products of many manufacturers and used by us the fabric with PVC coating (the base material on which depends the durability of the product) - the production of the well-known South Korean company "Mirasol". Materials produced by this company have exclusive airtightness, elasticity and strength. A very important characteristic is a resistance to UV radiation. Materials we use, unlike the others, have a minimum percentage of burnout (1-2% per year), ie to notice this process will be possible only after 5-6 seasons of operation.

The main technology used is gluing, and dominant effect for strengthening of the seams has glue hardener. This important component that we use is produced by "Bayer AG" - the famous concern in the chemical industry in the world.

All used components are of the highest quality and are subjected to rigorous control input.

The quality of materials is complemented by the highly skilled hand work of carefully trained professionals and a multistage quality control system operating in the enterprise.

Year after year, innovation for innovation, amusements *RIF*® have always been the best and the most modern.

Range of products each year is increasing by 10-15%, which allows us to meet the needs of the market.

Each product type has been in operation for many years at the most incredible loads. Feedback from customers allows us to upgrade products for maximum comfort and durability of operation.

We make products in such a way that it does not require complicated maintenance and special storage conditions, therefore, the cost of maintaining equipment *RIF*® is practically zero.

System of long-term quality, including the warranty, prompt service, spare parts and accessories, make investments in equipment produced by *RIF*® more attractive.
